

Hospitality Hotel Phone Solutions

Bacteria-Resistant Hotel Phones

Protect your guests from unwanted germs

Vacationers and business travelers check in and out of your hotel on a daily basis—and so do their germs. But there's an easy way to keep your guests and housekeeping staff healthy. Outfit your hotel with VTech phones manufactured with anti-bacterial plastic. You'll help reduce the spread of the common cold, and other bacteria-causing illnesses.

Constant contact

Studies show that 80 percent of all infections are spread through contact. That makes hotel environments prime targets for bacteria and infection—especially areas that are touched by multiple people. Guests and staff are in constant contact with innumerable surfaces: doorknobs, remote controls, pens, light switches, clock radios, telephones and so much more.

No matter how efficient your housekeeping staff is, it's difficult to eradicate all the germs that yesterday's guests left behind. With VTech phones, everyone has an added layer of protection—and peace of mind.

Antibacterial plastic

What does antibacterial plastic really mean? In our case, it means that we've added Zeomic®, an inorganic antibacterial agent, to the plastic used in our hotel phones. Zeomic uses silver and other ions to prevent the growth and migration of bacteria, mold and fungus. Through nanotechnology, the ions are infused into the plastic, creating a stable agent that maintains its effectiveness for the life of our phones.

Hospitality Hotel Phones Features

Materials

New high-quality materials

Customisable Faceplate

Faceplates are fully customisable to fit your hotel's exacting brand standards.

Audio

Acoustically optimised audio chamber

Antibacterial Plastic

Contemporary SIP Corded Phones

VTech offers a comprehensive line of hotel phones that cater specifically to hospitality, providing hotel guests with a seamless experience.

Elegant styling lends a modern, fresh touch to guest rooms, while antibacterial plastic protects guests, while providing innovative contemporary and classic styles that complement today's interiors.

Our SIP options enable you to keep up with market needs for compatibility with open-source PBX platforms.

Contemporary SIP Cordless Phones

Make your guests feel right at home with VTech cordless phones.

Advanced DECT digital features ensure they stay connected to co-workers, clients and family members, while base and handset speakerphones deliver hands-free mobility.

Contemporary designs blend well today's fresh interiors, and antibacterial plastic keeps guests and housekeeping staff safe from germs.

Faceplates

Faceplates can be personalised during production - colours, text and logos. Pre-programming of keys is available. Additional Costs may apply.

Compatible with Major Platforms

The VTech Difference

Industry-Leading Warranties

Best-in-class warranties (five years for analog guest room phones, three years for SIP administrative phones, two years for SIP guest room phones and conference phones, one year for headsets) ensure customer satisfaction. If a replacement phone is needed, we send new (not refurbished like many of our competitors) product as an advanced parts replacement (APR). This translates to less downtime and more satisfaction for your customers and partners.

Support

Receive end-to-end complimentary support (pre-sales, post sales and field sales) from a team of New Zealand based sales people, engineers and marketing executives. Account managers throughout New Zealand uniquely position themselves to support your sales efforts. Our dedicated team of technical sales engineers provide an added level of specialised support.

Vertically - Intergrated Infrastructure.

Our global team of more than 1,500 R&D professionals continually innovate VTech products through state-of-the-art research, engineering and global design influence. Because VTech manages all phases of R&D, production, manufacturing, sales, and support, we deliver affordable, high-quality products to customers.
