

kuando™
BUSYLIGHT

by **Plenom.com**

3 in 1 solution

Presence, Ringer & Notification

No more **interruptions**
No more **missed calls**
Much better **team work**

*A balanced work-life
Keeps life balanced*

Presence status

The kuando Busylight works as a status light that automatically changes color according to your UC status in e.g. UC status (Skype4B/Jabber/RingCentral) to let colleagues know when you are:

- Available
- Busy / Busy in a call
- Do not disturb
- Away
- Incoming call / Incoming IM

Find customer experiences at Plenom.com

Built-in ringtones/speaker

With Busylight you secure all employees with a 100% reliable default solution. For call alert on incoming calls:

- *No audio settings required.*
- *Connects as an USB device – not an audio device.*
- *100% reliable – also when PCs have disabled soundcards/speakers.*
- *No more support tickets to fix individual audio settings.*
- *An immediate visible cue of your team's current status.*

Softphone notifications

Create an agile environment where employees can react quickly to missed calls or IMs. Avoid the risk of losing opportunities for your organization. The kuando Busylight decreases the average reply time in your organization and makes communication more efficient.

- *Flashes blue every four seconds to remind you of missed calls and IM's*
- *Visible from a distance*
- *Helps staff react much faster to unhandled tasks*
- *With Outlook calendar integration, the Busylight Alpha can even be a visual reminder of meetings etc.*
