

Busylight UC™ for Microsoft Lync

CALL ALERT & PRESENCE

Never miss a call on Lync

Feature: Busylight UC™ rings/flashs at incoming calls on Lync.

Why? Many computers have no speakers connected and if users are not wearing their headset they do not hear the ringing.

Silence the ringtones

Feature: Mute the ringtone and use silent flashes at incoming calls on Lync.

Why? To avoid noisy ringtones in open-plan offices. And to be able to determine the call from a distance.

Bring *presence* to the office

Feature: Busylight UC™ displays the current presence state in Lync with the colours red/dark red, green or yellow.

Why? To avoid interruptions by making colleagues in the office aware of the Lync presence states, especially “Busy” and “Do Not Disturb”.

Busylight UC™ for Microsoft Lync
