

Highly compatible with most routers - so it's truly versatile

Phone calls are becoming digital: Almost all connections are now IP based, so most people are already making calls over the Internet. There are many advantages to this, such as excellent HD sound quality, the ability to connect to three phone numbers at a time and being able to conduct multiple conversations simultaneously. You can enjoy all of these features with the universal Gigaset HX cordless handsets. As they're compatible with all DECT/CAT-iq-enabled routers, such as FRITZ!Box or Telekom Speedport, they're incredibly versatile - so you can carry on using them even if you change your router.

Specifications

Display Features

Display Type	Alphanumeric b&w illuminated
