Northern ★

OVERVIEW

Northern Servers have been custom designed for the requirements of the security industry and this 8 Bay server is a perfect video storage server for medium to large video management systems. The servers have been specifically designed with the performance criteria required as a Hanwha Wisenet WAVE Server or a Milestone XProtect Server.

Flexible storage options include JBOD or RAID using the optional high speed RAID controller with 1GB of cache for improved performance and RAID integrity. This unit is customizable to suit the requirements of the specific installation so please contact Atlas Gentech for more configuration options.
