

EVO192 Control Panel

EVO192 provide the highest level of protection for banks, high-security military and government sites, luxurious residential homes and any place where maximum security is essential

The modular concept of these systems provide installers with labour-saving features that make expanding, installing and servicing these systems quick and convenient.

Expand your system by adding expansion modules anywhere, in any combination, on the 4-wire combus. Modules are connected to the combus at the most convenient location and their zone inputs are assigned to the desired zone and partition.

Keyswitches, remote controls, and unused module inputs do not use zones. Once installed, all combus modules (including motion detectors) can be programmed remotely via a keypad, or the BabyWare PC software.

By merging security and access control, EVO systems increase the level of protection offered by security systems to a whole new level.

Features

- ▶ Internet Communication (IP150)
- ▶ Wireless Communication (PCS Series)
- ▶ In-field Upgradable
- ▶ Access Control
- ▶ App-based System Control

Technical Specifications

	EVO192
Maximum Zones*	192
On-board Zones	8
Partitions	8
User Codes	999
Multibus	Yes
Sleep Arming	Yes
Panel In-field Firmware Upgradable	Yes
Access Control (Doors)	32
Access Levels / Schedules	16 / 32
Events Buffered	3584
PGMs	32
PGM+/- Trigger	Yes
Virtual Zones**	32
Expansion Modules*	254
Supports IP/GPRS/GSM Communication	Yes
Supports VDMP3 Plug-in Voice Module	No
Supports IP150 Internet Module	Yes
Software	NEware, BabyWare
