TECHNICAL DATA

Parameters

RFID read-out distance 125 kHz RFID read-out distance 3-4 cm (depends on transponder type) Transmission In the real-time by GPRS/SMS Alarm events buffer size 100 Quantity of system events stored in history 5000 Timestamp event YES (date, time with 0.01s accuracy) GPRS/SMS transmission security AES encryption Device configuration Remote: via GPRS, SMS, CSD Remote firmware update YES Supported modems - Cirterion MCS5i, MCS5i-W (former Siemens) - simcom SIM300D, SIM340D - simcom SIM300D, SIM340D - ubox (Leon-G100, Leon-G200 - ubox (Leon-G100, Leon-G200 Voice call support YES User interface 3 buttons (PANIC, CALL-ME, RFID readout) Optical signalisation YES Sound signalisation YES Power supply - main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - inckel metal hydride 3.6 V, 40 mAh nominal capacity - backup battery allowing event registration (opening the housing and excessive shock) even after Main battery charging time max. 3 hours Main battery charging time max. 3 hours Power supply unit functions - low battery volking event registration (opening the housing and excessive shock) even after - uackup batte		
RFID read-out distance 3-4 cm (depends on transponder type) Transmission In the real-time by GPRS/SMS Alarm events buffer size 1000 Quantity of system events stored in history 5000 Timestamp event YES (date, time with 0,01s accuracy) GPRS/SMS transmission security AES encryption Device configuration Remote: via GPRS, SMS, CSD Local: PC through RS222 link (LX-PROG cable and AGP programmer required) Remote firmware update YES Supported modems - Cinterion MCS5i, MCS5i-W (former Siemens) - Simcom SIM300D, SIM3400 - u-blox Leon-G100, Leon-G200 Voice call support YES User interface 3 buttons (PANIC, CALL-ME, RFID readout) Optical signalisation YES Power supply - main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity - backup battery of lowing even after main battery discharge - obtattery voltage detection - backup battery alowing even after main battery discharge - obtattery charging time max. 1A Power supply unit	Reader type	Proximity RFID
International In the real-time by GPR5/SMS Alarm events buffer size 1000 Quantity of system events stored in history 5000 Timestamp event YES (date, time with 0.01s accuracy) GPRS/SMS transmission security AES encryption Device configuration Remote: via GPRS, SMS, CSD Cocal: PC through RS232 link (LX-PROG cable and AGP programmer required) Remote firmware update YES Supported modems - Cinterion MC55i, MC55i-W (former Siemens) - simono SIM300D, SIM340D - u-blox Leon-G100, Leon-G200 Voice call support YES User interface 3 buttons (PANIC, CALL-ME, RFID readout) Optical signalisation YES Vibration YES Nour Stattry vorking time after chargi	RFID reader frequency	125 kHz
Alarm events buffer size 1000 Quantity of system events stored in history 5000 Timestamp event YES (date, time with 0.01s accuracy) GPRS/SMS transmission security AES encryption Device configuration Remote: via GPRS, SMS, CSD Local: PC through RS232 link (LX-PROG cable and AGP programmer required) Remote firmware update YES Supported modems - Cinterion MC55i, MC55i-W (former Siemens) - Simcom SIMS00D, SIM340D - u-blox Leon-G100, Leon-G200 Voice call support YES User interface 3 buttons (PANIC, CALL-ME, RFID readout) Optical signalisation YES (3 LEDs) Sound signalisation YES Power supply - main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity - backup battery and battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity - backup battery voltage detection - fuse protection - fuse protection with configurable pre-alarm time - detecting excessive shock Hat can cause damage - the tilt detector with configurable pre-alarm time - detecting excessive shock that can cause damage - the tilt detector with configurable pre-alarm time - detecting	RFID read-out distance	3-4 cm (depends on transponder type)
Quantity of system events stored in history 500 Timestamp event YES (date, time with 0,01s accuracy) GPR5/SMS transmission security AES encryption Device configuration Remote: via GPRS, SMS, CSD Local: PC through RS232 link (LX-PROG cable and AGP programmer required) Remote firmware update YES Supported modems - Cinterion MC55i, MC55i-W (former Siemens) - Simcom SIM500D, SIM340D - u-blox Leon-G100, Leon-G200 Voice call support YES User interface 3 buttons (PANIC, CALL-ME, RFID readout) Optical signalisation YES Sound signalisation YES Vibration YES Power supply - main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity - backup battery voltage detection - fuse protection - fuse protection of battery cover opening even after main battery discharge - backup battery allowing event registration	Transmission	In the real-time by GPRS/SMS
Timestamp event YES (date, time with 0.01s accuracy) GPRS/SMS transmission security AES encryption Device configuration Remote: via GPRS, SMS, CSD Local: PC through RS232 link (LX-PROG cable and AGP programmer required) Remote firmware update YES Supported modems - Cinterion MC55i, MC55i-W (former Siemens) - Sincorn SIM300D, SIM340D - Urbox Leon-G100, Leon-G200 Voice call support YES User interface 3 buttons (PANIC, CALL-ME, RFID readout) Optical signalisation YES Sound signalisation YES Power supply - main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity - backup battery voltage detection - fuse protection - fuse protection - detection or battery cover opening even after main battery discharge - backup battery discharge - backup battery discharge - backup battery discharge - ackup battery discharge Bailt-in accelerometer functions - ma-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage	Alarm events buffer size	1000
GPRS/SMS transmission security AES encryption Device configuration Remote: via GPRS, SMS, CSD Local: PC through RS232 link (LX-PROG cable and AGP programmer required) Remote firmware update YES Supported modems - Cinterion MC55i, MC55i-W (former Siemens) - Simcom SIM300D, SIM340D - u-blox Leon-G100, Leon-G200 Voice call support YES User interface 3 buttons (PANIC, CALL-ME, RFID readout) Optical signalisation YES Sound signalisation YES Vibration YES Power supply - main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity Main battery charging time max. 3 hours Main battery charging time max. 1A Power supply unit functions - low battery voltage detection - detection of battery cover opening even after main battery discharge - backup battery allowing event registration (opening the housing and excessive shock) even after main battery discharge Built-in accelerometer functions - mar-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage - the tilt detector with configurable positions and angles Weight about 210 g Dimensions 207 x 58 x 39 mm <	Quantity of system events stored in history	5000
Device configuration Remote: via GPRS, SMS, CSD Local: PC through RS232 link (LX-PROG cable and AGP programmer required) Remote firmware update YES Supported modems - Cinterion MC55i, MC55i-W (former Siemens) - Simcom SIM300D, SIM340D - u-blox Leon-G100, Leon-G200 Voice call support YES User interface 3 buttons (PANIC, CALL-ME, RFID readout) Optical signalisation YES (3 LEDs) Sound signalisation YES Vibration YES Power supply - main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity Main battery oharging time after charging up to 2 days Main battery charging current max. 1A Power supply unit functions - low battery voltage detection - fuse protection - fuse protection - fuse protection - man-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage - the til detector with configurable pre-alarm time - detecting excessive shock that can cause damage - the til detector with configurable pre-alarm time - detecting excessive shock that can cause damage - the til detector with configurable pre-alarm time - detecting excessive shock that can cause damage - the til detector with configurable presitons and angles Weight	Timestamp event	YES (date, time with 0,01s accuracy)
Local: PC through RS232 link (LX-PROG cable and AGP programmer required)Remote firmware updateYESSupported modems- Cinterion MC55i, MC55i-W (former Siemens) - Simcom SIM300D, SIM340D - u-blox Leon-G100, Leon-G200Voice call supportYESUser interface3 buttons (PANIC, CALL-ME, RFID readout)Optical signalisationYESSound signalisationYESVibrationYESPower supply- main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity - backup battery voltage detection - fuse protectionMain battery charging timemax. 3 hoursMain battery charging currentmax. 1APower supply unit functions- low battery voltage detection - fuse protection - fuse protection - fuse protection - fuse protection - fuse protection - fuse protection - fuse protection detection or with configurable pre-alarm time - detecting excessive shock hat can cause damage - the tilt detector with configurable positions and anglesBuilt-in accelerometer functions- man-down detection with configurable positions and angles - the tilt detector with configurable positions and anglesWeight Dimensions207 x 58 x 39 mmProtection ratingIP67	GPRS/SMS transmission security	AES encryption
Remote firmware update YES Supported modems - Cinterion MC55i, MC55i-W (former Siemens) - Simcom SIM300D, SIM340D - u-blox Leon-G100, Leon-G200 Voice call support YES User interface 3 buttons (PANIC, CALL-ME, RFID readout) Optical signalisation YES Sound signalisation YES Vibration YES Power supply - main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity Main battery working time after charging up to 2 days Main battery charging current max. 1 A Power supply unit functions - low battery voltage detection - fuse protection - detection of battery cover opening even after main battery discharge - backup battery allowing event registration (opening the housing and excessive shock) even after main battery discharge Built-in accelerometer functions - man-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage - backup battery discharge Weight about 210 g g Dimensions 207 x 58 x 39 mm Protection rating IP67	Device configuration	Remote: via GPRS, SMS, CSD
Supported modems - Cinterion MC55i, MC55i-W (former Siemens) - Simcom SIM300D, SIM340D - u-blox Leon-G100, Leon-G200 Voice call support YES User interface 3 buttons (PANIC, CALL-ME, RFID readout) Optical signalisation YES Sound signalisation YES Vibration YES Power supply - main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity Main battery working time after charging up to 2 days Main battery charging current max. 1 A Power supply unit functions - low battery voltage detection - detection of battery cover opening even after main battery discharge - backup battery allowing event registration (opening the housing and excessive shock) even after main battery discharge Built-in accelerometer functions - man-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage - the tilt detector with configurable positions and angles Weight about 210 g Dimensions 207 x 58 x 39 mm Protection rating IP67		Local: PC through RS232 link (LX-PROG cable and AGP programmer required)
- Simcom SIM300D, SIM340D - u-blox Leon-G100, Leon-G200Voice call supportYESUser interface3 buttons (PANIC, CALL-ME, RFID readout)Optical signalisationYES (3 LEDs)Sound signalisationYESVibrationYESPower supply- main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacityMain battery working time after chargingup to 2 daysMain battery charging currentmax. 1 APower supply unit functions- low battery voltage detection - fuse protection - detection question of battery dischargeBuilt-in accelerometer functions- man-down detection with configurable pre-alarm time - detection gates shock that can cause damage - the tilt detector with configurable positions and anglesWeightabout 210 gDimensions207 x 58 x 39 mmProtection ratingIP67	Remote firmware update	YES
Voice call support YES User interface 3 buttons (PANIC, CALL-ME, RFID readout) Optical signalisation YES (3 LEDs) Sound signalisation YES Vibration YES Power supply - main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity Main battery working time after charging up to 2 days Main battery charging time max. 3 hours Main battery charging current max. 1A Power supply unit functions - low battery voltage detection - fuse protection - detection of battery cover opening even after main battery discharge - backup battery allowing event registration (opening the housing and excessive shock) even after main battery discharge Built-in accelerometer functions - man-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage - the tilt detector with configurable positions and angles Weight about 210 g Dimensions 207 x 58 x 39 mm Protection rating IP67	Supported modems	- Simcom SIM300D, SIM340D
User interface3 buttons (PANIC, CALL-ME, RFID readout)Optical signalisationYES (3 LEDs)Sound signalisationYESVibrationYESPower supply- main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacityMain battery working time after charging Main battery charging currentup to 2 daysMain battery charging currentmax. 3 hoursMain battery charging currentmax. 1APower supply unit functions- low battery voltage detection - fuse protection - detection of battery cover opening even after main battery discharge - backup battery allowing event registration (opening the housing and excessive shock) even after main battery dischargeBuilt-in accelerometer functions- man-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage - the tilt detector with configurable positions and anglesWeightabout 210 gDimensions207 x 58 x 39 mmProtection ratingIP67		
Optical signalisationYES (3 LEDs)Sound signalisationYESVibrationYESPower supply- main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacityMain battery working time after charging Main battery charging currentup to 2 daysMain battery charging currentmax. 3 hoursPower supply unit functions- low battery voltage detection - detection of battery cover opening even after main battery discharge - backup battery dischargeBuilt-in accelerometer functions- man-down detection with configurable pre-alarm time - detecting with configurable positions and anglesWeightabout 210 gDimensions207 x 58 x 39 mmProtection ratingIP67		
Sound signalisationYESVibrationYESPower supply- main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacityMain battery working time after chargingup to 2 daysMain battery charging timemax. 3 hoursMain battery charging currentmax. 1APower supply unit functions- low battery voltage detection - fuse protection - detection of battery allowing event registration (opening the housing and excessive shock) even after main battery dischargeBuilt-in accelerometer functions- man-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage - the tilt detector with configurable positions and anglesWeightabout 210 gDimensions207 x 58 x 39 mmProtection ratingIP67		
VibrationYESPower supply- main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacityMain battery working time after chargingup to 2 daysMain battery charging timemax. 3 hoursMain battery charging currentmax. 1APower supply unit functions- low battery voltage detection - fuse protection - detection of battery cover opening even after main battery discharge - backup battery allowing event registration (opening the housing and excessive shock) even after main battery dischargeBuilt-in accelerometer functions- man-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage - the tilt detector with configurable positions and anglesWeightabout 210 gDimensions207 x 58 x 39 mmProtection ratingIP67		
Power supply- main battery - lithium-ion polymer 3.7 V, 1600 mAh nominal capacity - backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacityMain battery working time after chargingup to 2 daysMain battery charging timemax. 3 hoursMain battery charging currentmax. 1APower supply unit functions- low battery voltage detection - fuse protection - detection of battery cover opening even after main battery discharge - backup battery allowing event registration (opening the housing and excessive shock) even after main battery dischargeBuilt-in accelerometer functions- man-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage - the tilt detector with configurable positions and anglesWeightabout 210 gDimensions207 x 58 x 39 mmProtection ratingIP67	Č.	
- backup battery - nickel metal hydride 3.6 V, 40 mAh nominal capacityMain battery working time after chargingup to 2 daysMain battery charging timemax. 3 hoursMain battery charging currentmax. 1APower supply unit functions- low battery voltage detection - fuse protection - detection of battery cover opening even after main battery discharge - backup battery allowing event registration (opening the housing and excessive shock) even after main battery dischargeBuilt-in accelerometer functions- man-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage - the tilt detector with configurable positions and anglesWeightabout 210 gDimensions207 x 58 x 39 mmProtection ratingIP67	Vibration	
Main battery charging time max. 3 hours Main battery charging current max. 1A Power supply unit functions - low battery voltage detection - fuse protection - detection of battery cover opening even after main battery discharge - backup battery allowing event registration (opening the housing and excessive shock) even after main battery discharge Built-in accelerometer functions - man-down detection with configurable pre-alarm time - detection g excessive shock that can cause damage - the tilt detector with configurable positions and angles Weight about 210 g Dimensions 207 x 58 x 39 mm Protection rating IP67	Power supply	
Main battery charging currentmax. 1APower supply unit functions- low battery voltage detection - fuse protection - detection of battery cover opening even after main battery discharge - backup battery allowing event registration (opening the housing and excessive shock) even after main battery dischargeBuilt-in accelerometer functions- man-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage - the tilt detector with configurable positions and anglesWeightabout 210 gDimensions207 x 58 x 39 mmProtection ratingIP67	Main battery working time after charging	up to 2 days
Power supply unit functions - low battery voltage detection - fuse protection - detection of battery cover opening even after main battery discharge - backup battery allowing event registration (opening the housing and excessive shock) even after main battery discharge Built-in accelerometer functions - man-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage - the tilt detector with configurable positions and angles Weight about 210 g Dimensions 207 x 58 x 39 mm Protection rating IP67	Main battery charging time	max. 3 hours
- fuse protection- detection of battery cover opening even after main battery discharge- backup battery allowing event registration (opening the housing and excessive shock) even after main battery dischargeBuilt-in accelerometer functions- man-down detection with configurable pre-alarm time - detecting excessive shock that can cause damage - the tilt detector with configurable positions and anglesWeightabout 210 gDimensions207 x 58 x 39 mmProtection ratingIP67	Main battery charging current	max. 1A
- detecting excessive shock that can cause damage - the tilt detector with configurable positions and angles Weight about 210 g Dimensions 207 x 58 x 39 mm Protection rating IP67	Power supply unit functions	 fuse protection detection of battery cover opening even after main battery discharge backup battery allowing event registration (opening the housing and excessive shock) even after main battery discharge
Dimensions 207 x 58 x 39 mm Protection rating IP67	Built-in accelerometer functions	- detecting excessive shock that can cause damage
Protection rating IP67	Weight	about 210 g
	Dimensions	207 x 58 x 39 mm
Vibration resistance 10-500 Hz with acceleration to 3G for 2 hours	Protection rating	IP67
	Vibration resistance	10-500 Hz with acceleration to 3G for 2 hours

PANIC

RED

NEW VERSION 3.0 REAL TIME GUARD TOUR SYSTEM PERSONNEL PROTECTION SYSTEM VOICE COMMUNICATION DEVICE

SECURITY

NEW VERSION OF THE WELL KNOWN ALL OVER THE WORLD DEVICE - ACTIVE CUARD 3.0

Active Guard is the most advanced, first of its kind in the world, system for monitoring the time, place and results of the work of personnel. By combining benefits of GPRS communication and RFID reading Active Guard can be used as a guard tour system, a personnel protection system and a voice communications device. Active Guard ensures the ability to react immediatel y, which helps increase the safety and guality of work. It gives instant irregularity warning.

Over 30 thousand devices all over the world!

- 6 years of experience!
- 3 rd version with new design and better functionality!

Designed for guard control, Active Guard is a highly flexible system and can be used also for other purposes, e.g. access control and identification, technical inspection monitoring, storage and rental systems monitoring, or maintenance systems.

NEW, BETTER FUNCTIONALITY AND DESIGN

Built-in accelerometer

Man-down detection – notification about life-threatening of the user life threat

Excessive shock detection - notification about attempt destroying the device

Tilt detection with configurable positions and angles - notification about changing the position of device - alarm signal if the position is outside the defined range

Form optymalization

More comfortable in use and more durable

Silicone gasket

Silicone gasket placed in special grooves in the housing - for better durability and tightness

More screws

Better distribution of forces at the fall

HOW IT WORKS?

EASY implementation and operation:

Realtime guard tour system.

Thanks to RFID reader Active Guard allows to control guard tours on basis of RFID tags placed on the round course. Monitoring software allows to establish timeframes for RFID tag reading. If no reading is recorded within specified time, the monitoring station notifies of irregularities.

Personnel protection system.

PANIC button can be used in case of emergencies. When PANIC button is being pressed device send an emergency signal to the monitoring station to ask for help. It is possible to record the voice communication surrounding the device by the monitoring system communication and show the position of device if it is supported by GSM network.

Voice communication device.

Active Guard allows also for GSM two-way voice communication. CALL ME button allows to send signal via GPRS to monitoring station to ask for reply (when it's pressed shortly) or to call directly to authorized number when it is pressed longer (i.e. police, fire station, supervisor, etc.). It is also possible to call the device from authorized number at any time.

The tags (control points) in form of key fob or coin tag can be can be fixed or mobile, can be easily programmed so as to provide appropriate messages after they have been read.

Resistance to destruction:

Resistance to any kind of weather conditions (cold, moisture, heat).

- Notification of all mechanical attempts to destroy device.
- Detector, which allows to determine whether the device was exposed to strong electromagnetic fields e.g. the origin of microwave.
- Higher reliability due to increased anti-sabotage security.

WHAT MORE OFFER AG:

Remote configuration and firmware upgrade - comfortable servicing and time savings Encryption of transmitted data using AES cipher - full data transfer safety Modem choice between three leading manufacturers - adapts the device to buyers personal preferences Power down by button combination - feature enables to turn off the device in designated areas without necessity of housing opening Increased event buffer capacity up to 1000 events - long lasting and easy device operation in areas with no GSM network coverage System event history - evidence up to 5000 events enabling to diagnose causes of possible problems Capability of adding a Bluetooth module - possibility to expand system by extra accessories (headset, GPS module) Registered battery lid opening event after main battery discharge - increased anti-sabotage security
