

# FLEXIDOME IP turret 3000i IR

www.boschsecurity.com

**BOSCH**

Invented for life

- ▶ 1080p and 5MP resolutions
- ▶ Built-in Essential Video Analytics to trigger relevant alerts and quickly retrieve data
- ▶ Fully configurable H.265 multi-streaming
- ▶ High Dynamic Range (120 dB) for challenging bright and dark scenes
- ▶ Built-in IR illuminator with 15 m (49 ft) viewing distance

The FLEXIDOME IP turret 3000i IR is built for high quality, 24/7 performance, with a range of reliable surveillance features, including Essential Video Analytics. The compact and minimalist design provides ease of installation.

## Functions

### Essential Video Analytics

The built-in video analysis reinforces the Intelligence-at-the-Edge concept and now delivers even more powerful features. Essential Video Analytics is ideal for use in controlled environments with limited detection ranges.

The system reliably detects, tracks, and analyzes objects, and alerts you when predefined alarms are triggered. A smart set of alarm rules makes complex tasks easy and reduces false alarms to a minimum. Metadata is attached to your video to add sense and structure. This enables you to quickly retrieve the relevant images from hours of stored video. Metadata can also be used to deliver irrefutable forensic evidence or to optimize business processes based on people counting or crowd density information.

### High Dynamic Range

The high dynamic range mode is based on a multiple-exposure process that captures more details in the highlights and in the shadows even in the same scene. The result is that you can easily distinguish objects and features, for example, faces with bright backlight. The actual dynamic range of the camera is measured using Opto-Electronic Conversion Function (OECF) analysis according to IEC 62676 Part 5.

### Intelligent streaming

Smart encoding capabilities, together with Intelligent Dynamic Noise Reduction technology and analytics, reduce the bandwidth consumption to extremely low levels. Only relevant information in the scene, like motion, or objects found with the analytics, need to be encoded.

The camera is capable of triple streaming which allows the camera to deliver independent, configurable streams for live viewing, recording, or remote monitoring via constrained bandwidths.

Each of these streams can be adapted independently to deliver high quality video, perfectly tailored to purpose, while reducing bit rate by up to 90% compared to a standard camera.

### H.265 high-efficiency video encoding

The camera is designed on the most efficient and powerful H.264 and H.265/HEVC encoding platform. The camera is capable of delivering high-quality and high-resolution video with very low network load. With a doubling of encoding efficiency, H.265 is the new compression standard of choice for IP video surveillance systems.

### Tamper and motion detection

A wide range of configuration options is available for alarms signaling camera tampering. A built-in algorithm for detecting movement in the video can also be used for alarm signaling.

### Built-in microphone and audio alarm

The camera has a built-in microphone to allow operators to listen in on the monitored area. Audio detection can be used to generate an alarm if needed.

### Recording and storage management

Recording management can be controlled by the Bosch Video Recording Manager application, or the camera can use local storage and iSCSI targets directly without any recording software. Local storage can be used for recording "at the edge" or for Automatic Network Replenishment (ANR) technology to improve the overall recording reliability. Pre-alarm recording in RAM reduces bandwidth consumption on the network and extends the effective life of the memory card.

### Edge recording

Insert a memory card into the card slot to store up to 2 TB of local alarm recording. Pre-alarm recording in RAM reduces recording bandwidth on the network, and extends the effective life of the memory card. It has advanced edge recording providing a reliable storage solution possible due to the combination of these functions:

- Industrial SD card support allows for extreme lifetime
- Health monitoring of industrial SD cards provide early service indications.

### DORI coverage

DORI (Detect, Observe, Recognize, Identify) is a standard system (EN-62676-4) for defining the ability of a camera to distinguish persons or objects within a covered area. The maximum distance at which a camera/lens combination can meet these criteria is shown below:

#### 1080p camera with 2.3 mm or 2.8 mm lens

DORI	DORI definition	Distance 2.3 mm/ 2.8 mm	Horizontal width
Detect	25 px/m (8 px/ft)	17 m/28 m (56 ft/93 ft)	77 m (252 ft)
Observe	63 px/m (19 px/ft)	7 m/11 m (22 ft/37 ft)	30 m (100 ft)

DORI	DORI definition	Distance 2.3 mm/ 2.8 mm	Horizontal width
Recognize	125 px/m (38 px/ft)	3 m/6 m (11 ft/19 ft)	15 m (50 ft)
Identify	250 px/m (76 px/ft)	2 m/3 m (6 ft/9 ft)	8 m (25 ft)

#### 5.3MP camera with 2.3 mm or 2.8 mm lens

DORI	DORI definition	Distance 2.3 mm/ 2.8 mm	Horizontal width
Detect	25 px/m (8 px/ft)	37 m/57 m (121 ft/ 188 ft)	123 m (403 ft)
Observe	63 px/m (19 px/ft)	15 m/23 m (48 ft/75 ft)	49 m (160 ft)
Recognize	125 px/m (38 px/ft)	7 m/11 m (24 ft/38 ft)	25 m (81 ft)
Identify	250 px/m (76 px/ft)	4 m/6 m (12 ft/19 ft)	12 m (40 ft)

### True day/night switching

The camera incorporates mechanical filter technology for vivid daytime color and exceptional night-time imaging while maintaining sharp focus under all lighting conditions.

### Easy installation

Power for the camera can be supplied via a Power-over-Ethernet compliant network cable connection. With this configuration, only a single cable connection is required to view, power, and control the camera. Using PoE makes installation easier and more cost-effective, as cameras do not require a local power source.

The camera can also be supplied with power from +12 VDC power supplies.

For trouble-free network cabling, the camera supports Auto-MDIX which allows the use of straight or cross-over cables.

### Data security

Special measures have been put in place to ensure the highest level of security for device access and data transport. The three-level password protection with security recommendations allows users to customize device access. Web browser access can be protected using HTTPS and firmware updates can also be protected with authenticated secure uploads. The on-board Trusted Platform Module (TPM) and Public Key Infrastructure (PKI) support, guarantee superior protection from malicious attacks. The 802.1x network authentication with EAP/TLS, supports TLS 1.2 with updated cipher suites including AES 256 encryption.

The advanced certificate handling offers:

- Self-signed unique certificates automatically created when required
- Client and server certificates for authentication
- Client certificates for proof of authenticity
- Certificates with encrypted private keys

**System integration and ONVIF conformance**

The camera conforms to the ONVIF Profile S, ONVIF Profile G and ONVIF Profile T specifications. For H.265 configuration, the camera supports Media Service 2, which is part of ONVIF Profile T. Compliance with these standards guarantees interoperability between network video products regardless of manufacturer. Third-party integrators can easily access the internal feature set of the camera for integration into large projects. Visit the Bosch Integration Partner Program (IPP) website ([ipp.boschsecurity.com](http://ipp.boschsecurity.com)) for more information.

Backlight compensation	On/off
Contrast enhancement	On/off
Noise reduction	Intelligent Dynamic Noise Reduction with separate temporal and spatial adjustments
Intelligent defog	Intelligent Defog automatically adjusts parameters for best picture in foggy or misty scenes (switchable)

**Video content analysis**

Analysis type	Essential Video Analytics
Features	Rule based alarms and tracking, Line crossing, Enter / leave field, Follow route, Loitering, Idle / removed object, People counting, Crowd density estimation, 3D tracking

**Additional functions**

Privacy Masking	Eight independent areas, fully programmable
Display stamping	Name, Logo, Time; Alarm message
Pixel counter	Selectable area

**Local storage**

Internal RAM	up to 5 s pre-alarm recording
Memory card slot	microSDHC / microSDXC SD card slot
Industrial SD cards	Extreme lifetime and health monitoring support that provides early service indication

Input/output	
Audio input	Built-in mic
Audio line out	16 Ohm typical; output 0.875 Vrms
Alarm input	Short or DC 5 V activation
Alarm output	Maximum load: 12 VDC / 50 mA
Ethernet	RJ45 connector

Audio streaming	
Standard	G.711, 8 kHz sampling rate L16, 16 kHz sampling rate AAC-LC, 48 kbps at 16 kHz sampling rate AAC-LC, 80 kbps at 16 kHz sampling rate
