

WHAT IS THE OFFICE IN A BOX SOLUTION?

An all in one appliance that delivers:

WHAT DOES OFFICE IN A BOX SOLUTION DO FOR MY BUSINESS?

4G LTE Broadband Connection Ensures Business Continuity

With businesses relying more heavily on Cloud services for business applications it is becoming increasingly important to have reliable access services that ensure the business continuity.

The AR Router range from Huawei has built in LTE Failover, making sure you can be confident that your business is 'Always On' even when your access services go down.

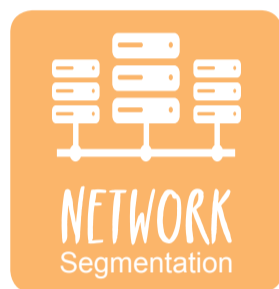

Huawei Value Added Data and Value Added Security Package

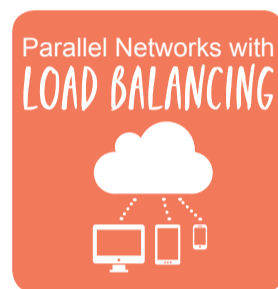

Ensure your security standards and protocols are current and up to date with Huawei's Cloud Security Package.

Allow your remote works and offices a reliable VPN service to ensure business never stops.

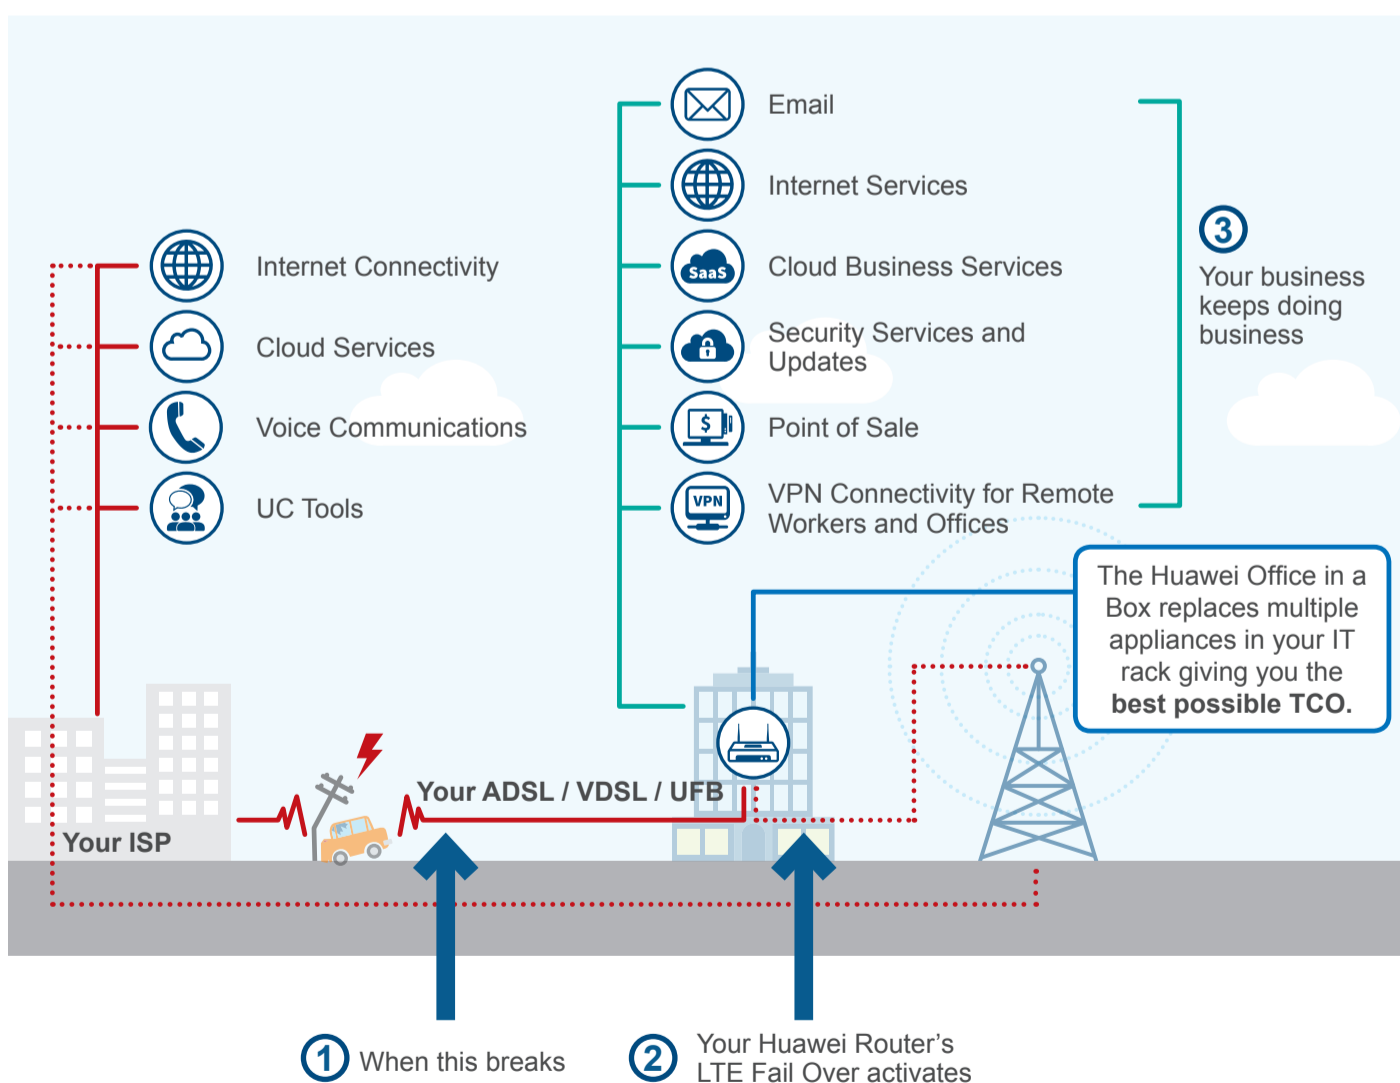

Ensure your network remains secure with network segmentation. Separate your development team from the internet and minimise IP leakage. Protect IP assets and increase network efficiency.

Handle increased traffic loads on your network with load balancing between xDSL, UFB and LTE. Load Balancing provides High Availability without High Cost.

YOUR BUSINESS - THE HUAWEI WAY

CONNECTIVITY, RELIABILITY, SECURITY AND MOBILITY IN A SINGLE APPLIANCE.
YOUR BUSINESS ALWAYS ON, ALWAYS SAFE, ALWAYS MOBILE.
