The Open Platform Company

Helping you do more

Interactive monitoring for mid-size installations

XProtect Professional is comprehensive open platform IP video management software (VMS) for mid-sized installations with multiple buildings. It supports an unlimited number of Recording Servers and cameras enabling users to scale their installation easily and cost-efficiently.

XProtect Professional offers a complete visual overview of campus-style installations from a single interface displaying multi-layered maps that show all camera locations. With

XProtect Professional it is easy to identify and address incidents occuring throughout the entire installation since alarms are displayed directly in maps of the system. If an incident occurs, efficient video search tools enable users to easily find relevant video clips and export evidence.

Users with different skill levels and system access can view live and recorded video through three intuitive viewing interfaces including Milestone Mobile for access on-the-go.

Comprehensive interactive monitoring solution

XProtect Professional offers comprehensive features such as built-in motion detection and alarm handling to ensure users are aware of and notified of incidents helping improve response times and decreasing false alarms. XProtect Professional is powered by three user-friendly interfaces: XProtect® Smart Client, XProtect® Web Client and Milestone Mobile. All XProtect clients are available in 26 languages and are flexible for users with different surveillance skill levels. The clients also help provide a great overview of the installation regardless of the user's location.

Playback view

- **XProtect Smart Client** is the primary interface for security operators; it provides unique video search tools such as Smart Search and the Sequence Explorer to quickly locate recordings of incidents.

  Smart Search lets users search for motion in one or more selected areas of images from a particular camera.

  The **Sequence Explorer** displays a visual overview of captured video and time intervals from one or more cameras as drag-and-throw image thumbnails to help collect evidence quickly.

- **XProtect Web Client** provides flexible access for users to view, playback and export video from any internet enabled PC.

- **Milestone Mobile** is an application which enables users to view, playback and export video from most mobile devices or tablets.

  Video Push enables Milestone Mobile users to turn their mobile devices into portable evidence collectors. Patrol personnel can document incidents with the device's camera and push video to be viewed directly into XProtect Smart Client. All video evidence collected through this method will be recorded the same way as any other video camera. With Video Push, security staff can stream live events and extend the visibility of central monitoring stations allowing them to act in a more proactive way.

Advanced software with powerful tools:

Integration of applications
Allows third-party integrations such as video analytics and access control while still managing the entire installation through one unified interface

Milestone Interconnect
A unique system concept that allows XProtect Professional to be interconnected with Milestone's premium software XProtect® Corporate
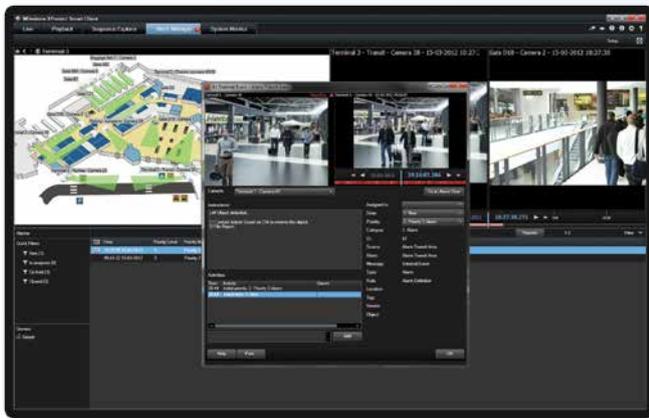

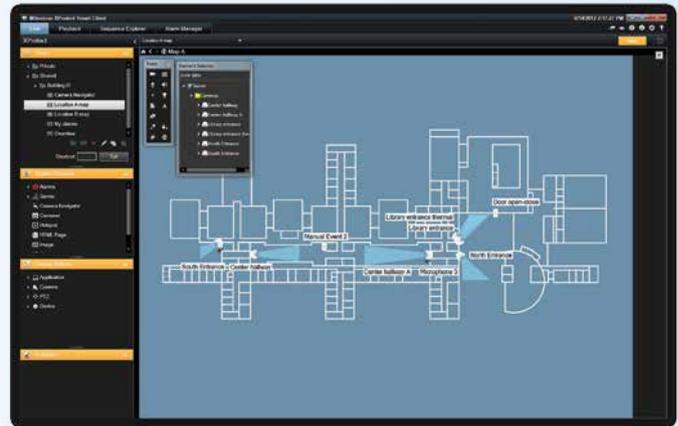

An easy overview of campus-style installations

With XProtect Professional, it is easy to gain an overview of incidents occurring in the installation and efficiently control cameras associated with those incidents. The Camera Navigator enables users to track moving objects among multiple buildings as well as identifying all cameras related to a specific incident. This feature empowers users to visually verify any incidents to discard false alarms.

Maps

XProtect Professional features interactive and multi-layered maps displaying the location of every camera in a surveillance installation. Users can see a preview of video from any camera directly in the map.

The Map function improves efficiency in larger surveillance installations by providing instant verification of issues and security breaches, resulting in faster response times.

Alarm Manager

The Alarm Manager consolidates all the alarms from a security installation into one video-enabled single point alarm function. It also provides a unified and clear overview of any system-related alarm allowing security operators to prioritize the most critical ones.

All cameras within the area of the triggered alarm will be presented clearly on a map so users can quickly examine the incident and minimize the number of false alarms. The Alarm Manager displays priorities, instructions that need to be followed, alarm statuses and escalation possibilities to optimize the handling of each individual alarm.

Customer Dashboard

A unique online monitoring service that allows resellers to ensure surveillance installations are operating at an optimal level and cameras are connected and recording

*Available with a valid Software Upgrade Plan

Camera discovery

Automatically detects and configures new cameras that are added to an existing system, enabling users to quickly expand their installation
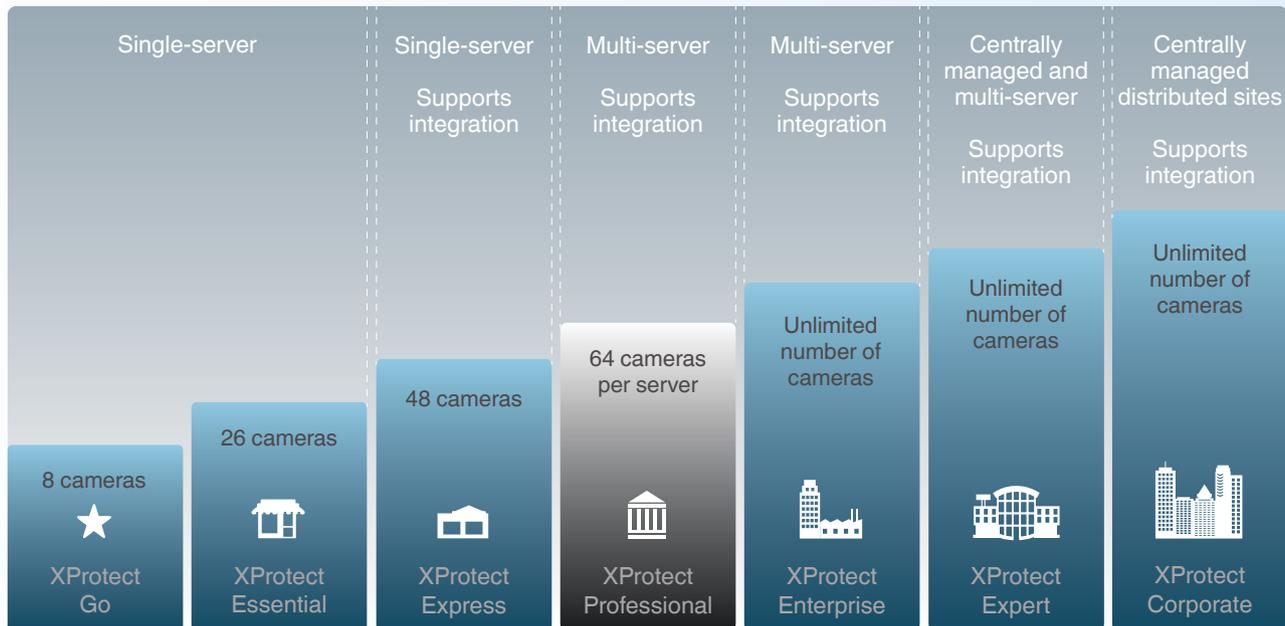

Alert Handling

Video is only recorded by events or motion detection triggered by the system or cameras

The Milestone Open Platform

A foundation for long-term success

Milestone's XProtect open platform video management software (VMS) integrates with the industry's widest choice in cameras, giving you the freedom to choose equipment according to your needs and budget. Committed to providing a true IP video open platform and freedom of choice, Milestone is proud to be among the first VMS vendors to support and lead the future progress of ONVIF and PSIA standards.

Integrate applications and systems into XProtect VMS with the Milestone Integration Platform Software Development Kit (MIP SDK). The open architecture of XProtect, together with the MIP SDK, allows for endless possibilities to add features and functionality for creating powerful, custom surveillance solutions.

About Milestone Systems

Founded in 1998, Milestone Systems is a global industry leader in open platform IP video management software. The XProtect platform delivers powerful surveillance that is easy to manage, reliable and proven in thousands of customer installations around the world. With support for the widest choice in network hardware and integration with other systems, XProtect provides best-in-class solutions to video enable organizations – managing risks, protecting people and assets, optimizing processes and reducing costs. Milestone software is sold through authorized and certified partners. For more information, visit: www.milestonesys.com
