

# XProtect® Professional

# XProtect® Professional

Comprehensive open platform video management software (VMS) for mid-sized installations with multiple buildings. It offers a complete visual overview of the surveillance installation with interactive maps that show camera locations.

## Suited for:

- ✓ Multi-server, campus-style installations for live monitoring
- ✓ Hospitals, universities and hotels

## Product characteristics:

- ✓ Unlimited number of cameras and Slave Recording Servers
- ✓ Choice of three viewing clients: XProtect® Smart Client, XProtect® Web Client and Milestone Mobile available in 26 languages
- ✓ Integrates with third-party applications
- ✓ Privacy masking to conceal certain areas
- ✓ Automatic camera discovery configures all new cameras
- ✓ Alert handling ensures video is only recorded by events or motion detection
- ✓ Two-way audio feature to enable communication at security entrances
- ✓ Unique video search tools to quickly locate evidence
- ✓ Ability to export video to multiple formats
- ✓ Support for Milestone Interconnect™ and Milestone Customer Dashboard

## Solutions to empower you:

- ✓ Multi-layered maps for a comprehensive overview of the entire surveillance installation
- ✓ The Alarm Manager provides a consolidated overview of alarms and instant access to cameras for immediately visual verification
