Busylight for Microsoft Lync

Boost productivity, user satisfaction and the adoption of Lync

Busylight displays the current Lync presence state

- **BUSY**
- **AWAY**
- **AVAILABLE**
- **DO NOT DISTURB**

- Reduces costly, unwanted interruptions by co-workers.
- Creates awareness and acceptance of 'presence'.
- Gives employees control over their availability.
- Saves walking to busy colleagues in the office.

Busylight rings and/or flashes on incoming Lync calls and IM's

- Makes people feel comfortable with Lync.
- Ensures fewer missed Lync calls. and messages.
- Closes the gap between a PBX solution and Lync.
- Lets people determine a call from a distance.

Business value

Busylight boosts user adoption of Lync

- Users' willingness and ability to adopt Lync is a major factor affecting the benefits of Lync.*
- Busylight makes users feel comfortable with Lync's features and eases the transition from PBX to Lync.
- The Lync business case is improved by a faster adoption and a reduced payback period.

* "Total Economic Impact of Microsoft Lync Server 2010", Forrester Research.

Busylight increases productivity

- Interruptions now consume more than 2 hours/day for a knowledge worker.*
- Transforming interruptions into value adding work will increase productivity – an add-on to your Lync business case.
- Minimising the number of missed calls in customer-facing activities safeguards your business risk when introducing Lync Voice.

* "The Cost of Not Paying Attention", Basex

Busylight improves employee satisfaction

- Two out of three employees feel that their colleagues interrupt too much.*
- Busylight is designed to improve the work environment in open-plan offices.
- High employee satisfaction and motivation is a key factor to delivering great business results.

* Jabra/Enalyzer 2008
