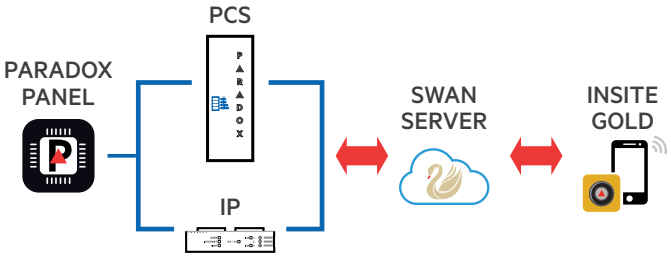
SWAN Server and Insite GOLD – How to use it?

Introduction

SWAN is a server created to be a bridge between Paradox systems IP devices, IP cameras and mobile devices using the Insite GOLD application. Using the SWAN server allows connection to all without any local IP programming or programing of Paradox devices. Enrolling an account and creating a site is very easy and takes a few minutes. SWAN also provides reliable system push notifications, as well as supervision lost notification.



Your Living and Safety Assurance – SWAN Server

- Bridge to connect Paradox systems to Cellular or IP devices
- Reliable 24/7 connection
- Bridge for push notifications
- Site supervision and push if lost
- Auto-connect to PCS cellular devices and IP150
- No port forwarding, IP programming/configuration or UPNP required
- Encrypted communication – no data kept on server
- Simple account creation with email and Site Panel serial number
