Stand-Alone Transmitter

Features:

Utilizing secure Code-Hopping Encryption

4 Channel telemetry outputs

Normally open or Normally closed trigger inputs

LED indication when a channel is triggered

Reliable crystal frequency stability controlled +/- 100KHz

1 or 3 transmit signals can be selected

All inputs are supervised so that the unit can be triggered on
  more than one channel at the same time.

Shuttleworth

Specification

Encryption Type:.............Code-Hopping

Transmit range:..............1km Line-of-site

Frequency - Standard:.....403.55MHz

          - Special:.......433.92MHz

Voltage Range:...............11V to 14V DC

Dimensions (lxbxh):........187 x 104 x 67mm

Gross Weight:................235 grams

Current Draw:................32mA

Operating Temp:............0°C to 49°C

Applications:

- Sending Alarm signals in a home estate back to the guard house

- Linking Electric fence outputs to an alarm panel

- Switching On / Off Pumps (PUMP Version Software)

- Machinery control

Order Codes:

Stand-Alone Transmitter: 1Km 4 x Trigger Inputs	S4
Stand-Alone Transmitter: 1Km On/Off Trigger Inputs	S4-PUMP
