

4 Series TandemVu PTZ Camera

Big picture and details, in one view

The **TandemVu SE4 PTZ** camera integrates a bullet camera and a PTZ camera into one unit. Users get a stable and complete view of the surroundings during the pan, tilt and zoom manoeuvres, without missing anything important. The TandemVu SE4 PTZ combines the benefits of both a wide-angle camera and a PTZ camera, providing a more versatile and effective solution for security monitoring purposes.

Why TandemVu PTZ Cameras

Big Picture and Details, In One View

Shortcomings of Conventional Cameras

Single Fixed Lens Camera

Lack of details
when it pans and tilts

Lose overall view
when it zooms in

Single PTZ + Fixed Camera

AcuSense Technology Brings Intelligence and Efficiency

- **Reduce False Alarm**

Both PTZ and bullet channels have AcuSense deep learning algorithm to identify targets as human or vehicle. This helps to reduce false alarm significantly.

- **Quick target search**

Find the video you need more quickly with classified video footage in Hikvision NVRs.

AcuSense
Technology

Enjoy Multiple Advantages of The Integrated Design

Cost saving

TandemVu

Easy installation

Application Scenarios

Product Showcase

TandemVu

DS-2SE4C425MWG-E(14F0)

AcuSense Technology

Human and vehicle classification

Lightweight Design

Weigh up only 2.4kg (13.2 lb)

ColorVu Technology

24/7 Colourful imaging in bullet channel

HD Resolution & Optical Zoom

4 MP & 4 MP @ 25x

Power Supply

Supports POE+, or 12V DC. Typical power consumption 11 Watts, with supplement lights and heater OFF

3D Positioning

Click or draw a box in overview channel, and PTZ will zoom in accordingly
